NCCCO has established specific conditions and guidelines that each Practical Examination Test Site must adhere to. This *Site Report* is designed to ensure these conditions are met. The Examiner is required to perform a site inspection prior to the start of the first examination and complete the *Site Report* form. The Examiner must arrive at the Test Site in sufficient time to verify, by measuring with a tape, the accuracy of the course layout with respect to the NCCCO Test Site Layout (CAD). The Examiner must also conduct a visual inspection of the dedicated pile driver for proper setup prior to testing any applicant. This *Site Report* must be presented on demand to any Practical Test Auditor.

If using more than one course at this test site, please fill out a Site Report for each course.

Please type or print neatly.		
TEST SITE	DATE	
NAME OF TEST SITE COORDINATOR		
Check the following items for compliance:		
PRE-TEST CANDIDATE BRIEFING AREA		
A suitable location for the Pre-Test Briefing of exam candidates, including:		
 Sufficient tables and chairs to seat all candidates for the Pre-Test Briefing A location so that waiting candidates are unable to observe other candidates being tested 		
Candidate materials available:		
 A written description of the examination (Candidate Handbook) A plan view of the Test Site Layout (CAD) Operator's manual and load chart(s) for all dedicated pile drivers that will 	ll be used for testing	
TEST SITE SETUP		
 Corridor has no more than a 6 in. maximum change in elevation and is free of vegetation Test Site is free of debris, stored materials, surface irregularities, or hazards such as overhead power lines that could interfere with test maneuvers 		
☐ No obstructions are within 5 ft. of the test course in any direction		
Using the Test Site Layout (CAD), verify the following measurements:		
 □ Distance from the center of rotation (CoR) to the center of Designated Arc □ Distance from the CoR to the center of DA-2 (± 1 in.) □ Distance from the CoR to the center of DA-3 (± 1 in.) □ Distance from the CoR to the center of DA-4 (± 1 in.) 	ea 1 (DA-1) (± 1 in.)	
☐ Distance between center of DA-4 and edge of tracks is 60 in. (± 1 in.)		
☐ Distance between from DA-3 and the Pile Plate is 72 in. (± 1 in.)		
☐ Width of Corridor is 3 ft. (± ½ in.)		
☐ Distance between consecutive poles (center-to-center) is 3 ft. ($\pm \frac{1}{2}$ in.)		
BARRELS		
☐ Three empty steel drums, approximately 22 in. diameter, 24 in. tall (e.g., 5 at one end	5-gallon drums cut to proper height), open	
☐ Identified as No 1, 2 and 3 in numerals large enough to be clearly seen fro	_	
\square Each placed on a 4 ft. x 4 ft. sheet of 3/4-inch CDX-grade (or better) plywood. A spare barrel is available.		

SITE REPORT (CONT'D)

PRACTICAL EXAMINATION—DEDICATED PILE DRIVERS

Test Site #:	
PAGE 2 of 3	
PVC POLES	
□ 8 (+ 2 replacement) poles, made of 1½ in., white PVC pipe (SCH 40), each 36 in. long with top 12 in. painted or taped orange or red (one inside splice per 3 ft. pole permitted; outside splices of PVC pipes NOT permitted; see page 27 for illustration)	
□ Poles must be mounted to a platform made of two layers of ¾-inch, CDX-grade (or better) plywood or high density polyethylene (HDPE), cut into nominal 12 in. squares	
 □ A taut, longitudinal string line placed on the ground under the centerline of each pole base, per CAD. A cut concrete line may be used in lieu of a string line; no other materials are acceptable. □ 8 (+ 3 replacement) tennis balls 	
DESIGNATED AREAS □ Clearly marked CoR	
☐ DA-1, DA-2, and DA-3 are clearly marked and visible to candidate	
□ DA-1, DA-2, and DA-3 have a second circle with an outside diameter of 18 in. and clearly visible inside line (2 in. minimum width)	
☐ DA-4 is a 4 ft. x 4 ft. sheet of ¾-inch CDX-grade (or better) plywood	
☐ Clearly visible perimeter line (2 in. minimum width), marked inside DA-2, DA-3, and DA-4.	
☐ Clearly marked area for Dig Hole Task	
TEST WEIGHT FOR TASK 2	
☐ Sufficient weight to provide overhaul to prevent unspooling of hoist line	
☐ Cylindrical in shape with no protruding edges	
☐ The outside diameter of the Test Weight is 12 in.	
☐ Cylinder must be 20 in. tall	
Method of attachment: Single attachment point at the top inside of the Test Weight	
☐ 2 in. wide visible painted or taped line completely around the Test Weight starting 12 in. from the bottom of the Test Weight	
☐ Made of steel pipe	
TEST PILE	
☐ Correct orientation based on CAD selection and pile butt in center of DA-4	
□ 25 ft. in length	
☐ 12 in. outside diameter	
☐ Made of steel pipe minimum 3/8 in. thick, max ½ in.	
☐ First pick point centered at 4 ft. from top of pile. Second pick point centered at 12 ½ ft. from top of pile	
☐ Bottom of pile has a welded cap	
PILE PLATE	
□ 3 ft. square	
☐ Made of steel plate

PRACTICAL EXAMINATION—DEDICATED PILE DRIVERS

	Test Site #:	
	PAGE 3 of 3	
RIGGING (TEST WEIGHT AND TEST PILE)		
☐ 10–12 ft. length chain		
☐ Hooks with self-closing latches at one end		
☐ Sufficient capacity to hoist Test Pile		
☐ Assembled in accordance with current ASME	B30.26 and OSHA standards	
TEST COURSE SETUP		
course. (Check only if the Practical Examiner		
☐ The Examiner must have the following items:	or conducting the Practical Exam: ☐ Proctor	
Two stopwatchesClipboard	☐ Verbatim instructions	
☐ Anemometer (wind meter)	☐ Notification of test email (new test sites if applicable)	
□ Pen	☐ Personal protective equipment	
☐ Spirit level	☐ Digital level	
☐ 2 measuring tapes (30 ft. minimum)	☐ Test Site Layout (CAD)	
☐ Visible marking paint		
Deviations from the above-noted requirement. Regional Office.	s are not allowed without written consent from the NCCCO Western	
PRACTICAL EXAMINER ATTESTATION (EXAM	-	
I attest that this is a true and accurate report of t	he above named Test Site.	
SIGNATURE OF EXAMINER	DATE	
PRINTED NAME OF EXAMINER	EXAMINER ACCREDITATION NUMBER
